

Structured Cabling Solutions for Government

S o l i d . S e c u r e . S m a r t .

Experience

Since 1941, AMP and AMP NETCONNECT products from Tyco Electronics have provided connectivity solutions for Defense, Intelligence and Civilian agencies. Today, innovative, robust, reliable and cost-effective AMP NETCONNECT structured cabling systems are installed around the world on military bases, and in government data centers, offices, and classified facilities.

Solid

You'll spend less time managing your network and more time serving your constituents with our full suite of reliable, robust, high performance structured cabling solutions.

- **Shielded XG 10G Category 6A:** die-cast, robust AMP-TWIST RJ-45 jacks with certified Category 6A performance for 10 Gigabit Ethernet
- **PARA-OPTIX, PARALIGHT, and MRJ21 cabling systems:** Modular, high-density infrastructure in a smaller footprint
- **AMPTRAC intelligent infrastructure management systems:** track assets automatically, reduce network downtime and boost productivity

Secure

Our fiber and copper AMP NETCONNECT secure technology makes it easier for Defense and Intelligence agencies to fortify classified networks without sacrificing performance. We simplify the process of segregating networks, protect them against RFI/EMI and reduce radiated signals with a complete line of secure solutions.

- **XG Optical Fiber:** a certified end-to-end optical fiber cabling system
- **Shielded XG 10G Category 6A:** a certified end-to-end shielded cabling system
- **Secure Connectivity:** ten keying options for MT-RJ, LC, MPO and six for RJ-45

Smart

When you require faster installation, easier reconfigurations, and reduced operating costs, AMP NETCONNECT is the smart choice.

- **Shielded XG 10G Category 6A:** shielded cable termination and bonding in less than 90 seconds!
- **MPO, MRJ21, AMPINNERGY and Undercarpet Cabling:** accelerated infrastructure installation with flexibility for reconfigurations
- **AMPTRAC intelligent infrastructure management system:** automated infrastructure documentation for copper and fiber networks
- **Lead-free and Reduction of Hazardous Substances compliant products**

The Tyco Electronics Advan

Tyco Electronics has experience working with government agencies, contractors, system integrators, and more. We have the experience to your project.

One Manufacturer: As a single-source manufacturer offering complete fiber and copper solutions, Tyco Electronics simplifies the specification, engineering, and acquisition process.

Country of Origin: We strive to support trade agreements by supplying AMP NETCONNECT products that originate in the US and other countries that comply with country of origin requirements.

Contractor Expertise: AMP NETCONNECT copper and fiber systems are backed by our extensive network of certified Netconnect Design and Installers (ND&Is).

Small Business: At Tyco Electronics, we partner with innovative distributors, contractors and system integrators including: certified veteran, 8a, service-disabled veteran, disadvantaged, women-owned and HUB Zone-certified firms.

Security Clearance: Our solutions and ND&Is can meet a variety of security requirements for installations in DoD, INTEL, and State Department locations.

Engineering Support: Our global network of well-trained Systems Applications Engineers (SAE) provide specification and on-site support of government projects.

antage

system integrators, distributors and consultants, and is ready to apply that

Sourcing Options: We support commonly accessed sourcing options, such as GSA, GSA Connections, NASA Solutions for Enterprise-wide Procurement, and other government contract vehicles.

Global System Warranty: Tyco Electronics provides AMP NETCONNECT 25-year System and Application warranties directly to end-user clients, when products are installed by certified NETCONNECT designers and installers.

Specification Assistance: We match our solutions to agency requirements, offering a combination of standards-based and custom-designed solutions.

Training

Our BICSI-certified training courses ensure your systems achieve optimal performance and help your personnel stay on top of installation, troubleshooting, design and standards issues. On-site, customized complimentary training for fiber, copper, testing, and standards is also available for government clients.
