

## AMP NETCONNECT HOME NET-WORKS™

### DESCRIPTION

The AMP NETCONNECT Home Net-Works™ Structured Cabling System is a high performance infrastructure platform for distributing voice, data and video services throughout single or multi-family dwellings.

The RCS14 and RCS28 distribution enclosures fully support AMP NETCONNECT high-performance, modular connectivity solution –including Category 5e, Category 6 (shielded and unshielded) and fiber optic.

Front-loadable, snap-in connectivity modules combined with color-coded, configuration patch cords enable any outlet jack to be easily configured for analog voice (up to four lines), Ethernet, or other applications.

### PRODUCT FEATURES

- Enclosure 20Awg Steel
- Cover: 20Awg Steel
- Multiple double knockouts for cable entry on all surfaces
- Multiple cable tie tabs for cable management
- 1"x1" mounting grid for maximum versatility
- Recess or surface mount option
- Cover included
